

Agencies planned 79% of FY2025 IT spending, about \$83 billion, for operations and maintenance

Share of each agency's planned FY2025 IT spending that goes to operations and maintenance (O&M)

79% is all 24 agencies combined: \$82,828 million of \$105,136 million (78.8%). The other 21% is for development, modernization and enhancement.

GAO's report (page 1) also says agencies have typically reported spending about 80 percent on O&M. That general statement is separate from these FY2025 plans.

GAO notes it is uncertain how much O&M spending goes to legacy technology (report page 4).
